

Help us by evaluating our newest product. We'll waive the set-up fee and give you three months for free!

MoneyStream will soon introduce **PayrollKey**, its new Internet payroll product for small to medium businesses. Prior to full market release, we're looking for feedback from key businesses identified within our target market. We've identified your company as a high value customer so we're sending you this letter to invite you to apply to be one of our **pilot participants** for the new PayrollKey payroll product.

PayrollKey provides you with a range of payroll processing services, including:

- Security — imagine a payroll vault that only you can enter.
- Easy registration is done online in minutes.
- Online submission of Records of Employment (ROE) to HRDC.
- T4 and T4A Summaries filed electronically to CCRA.
- Calculate gross-to-net payroll online.
- Multiple direct deposits for each employee.
- Standard and ad-hoc reports available — print only the reports you want.
- Upgrades to software are transparent, automatic, and included.
- Customizable to your specific payroll needs.
- Eliminate cheque writing.

Imagine all these features in a service that's not only cost-effective but also flexible, robust, and secure. There's no costly investment in hardware or software because your payroll is accessed and entered via a secure web-browser over the Internet. Preview your completed payroll online prior to your approval for better accuracy and timely execution.

The pilot project will run for approximately 2 months. Selected pilot participants would be required to run the MoneyStream payroll product concurrently with existing payroll processing methods. Companies that participate in the pilot will receive the PayrollKey product **free of charge** for the first three months of their contract. In addition, the set-up fee will be waived.

PayrollKey joins our other acclaimed **E-Keys** products — PaymentsKey and ContributionsKey — in our suite of payment processing systems designed to simplify processes that are normally costly, time-consuming, and frustrating.

We know the features and benefits of this product far exceed what is currently offered to small and medium enterprises in Canada, and that you won't be disappointed. To apply, call me toll-free at **1-800-836-2890**. You can also fax the completed form below to me at **1-403-263-8793**, or email the information to us at **info@moneystream.ca**.

Sincerely,

Susan D. Sparkes-Hoskins, CAM
